1. TRUE – FALSE

- Tombstones are naturally porous and it is important to use a lot of water when cleaning a tombstone.
- It is appropriate to clean a tombstone with bleach after watering it down.
- Using shaving cream is an acceptable method for reading a tombstone.
- It is never acceptable to use a natural bristle brush to clean a tombstone.

2. What is the best method for cleaning a Tombstone?

3. What is the process for placing a DAR marker on the grave of Revolutionary War Patriot?

Hint: The Office of the Historian General oversees the approval process for gain permission to place a DAR Historical /Commemorative Markers and Markers for Revolutionary War Patriots. Go to the NSDAR Members Only website and Find the Historian General's website under "Member Resources – Executive Offices & NBM."

4. What were some of the contributing factors that made the Olivewood Cemetery project a success?

5. What did you learn from their efforts that you would duplicate in your own Historic Preservation project?
